

Observatory for monitoring nitrate in groundwater - Location: Nemščak

Scan Nitrolyser probe for measuring nitrate concentrations in groundwater

Control unit in a protective box.

Weather station

TDR Moisture meter

Temperature, electrical conductivity and groundwater level gauge

Observatory for monitoring nitrate in groundwater - Location: Skorba

Scan Nitrolyser probe for measuring nitrate concentrations in groundwater

Control unit in a protective box.

Weather station

TDR Moisture meter

Temperature, electrical conductivity and groundwater level gauge

Observatory for monitoring nitrate in groundwater - Location: Žalec

Scan Nitrolyser probe for measuring nitrate concentrations in groundwater

Control unit in a protective box.

Weather station

TDR Moisture meter

Temperature, electrical conductivity and groundwater level gauge

Observatory for monitoring nitrate in groundwater - Location: Drnovo

Scan Nitrolyser probe for measuring nitrate concentrations in groundwater

Observatory in the unsaturated zone – Lysimeter

TDR Moisture meter

Temperature, electrical conductivity and groundwater level gauge

Rain gauge

Wind gauge

Lysimeter - entrance

Lysimeter - montage

Observatory for the study of landslide dynamics – Tevče

Borehole TEV 1/21

Borehole TEV 2/21

Borehole TEV 2b/21

Borehole TEV 3/21

Borehole TEV 4/21

Drilling Borehole TEV 2b/21

Observatory for the study of rockfall formation: Location Zasavje

Observatory for the study of rockfall formation: Location Smrekovec

Observatory for the study of rockfall formation: Location Mežica

Observatory for the study of rockfall formation: Location Brezno

Observatory for the study of rockfall formation: Location Žužemberk

Observatory for monitoring the impact of shallow geothermal energy use
